

Brand Guide

How PikeSquare looks, sounds, and shows up.

VOICE

Like a senior operator who's been there.

Confident, direct, plain-spoken. Not a brochure. We take positions, use plain English, keep sentences short, and lean on the em dash.

DO

- Lead with a point of view. Take a position.
- Use plain English. "Helps close more deals," not "drives revenue acceleration."
- Keep sentences short. Em dashes are a feature.
- Write like you'd talk to a smart CEO over coffee.

DON'T

- Pile on adjectives. ("World-class, best-in-breed, enterprise-grade.")
- Hedge. ("It can sometimes be the case that...")
- Use buzzwords without a concrete claim behind them.
- Default to passive voice.

VOICE SAMPLES

"Senior GTM operators for startups and scale-ups." · "Price is your fair share of the value you create."

Marks.

Use the primary wordmark by default. Square lockup for avatars and tiles. Icon alone only when the wordmark won't fit. Files in /public/brand/.

Don't recolor, stretch, add shadows, or place on busy photos. Clear space = height of the "P" on all sides.
